Acronis
Audit Services

FOR THE ENTERPRISE

Decrease maintenance costs and enjoy peace of mind knowing your data is protected in accordance with industry and Acronis best practices. Acronis experts can audit your deployment to identify potential gaps and recommend changes to decrease maintenance efforts and the risks to your business operations.

Acronis can discover how you can ensure business continuity and provide recommendations to improve data protection:

- Understand how your business operates and determine Recovery Point and Recovery Time Objectives (RPOs and RTOs) to ensure business continuity.
- Discover network and equipment specifics, as well as potential points of failure in your environment.
- Audit current protection/data exchange schemes and product configurations.

- Recommend changes to your data protection/data exchange approach and maintenance policies and help leverage product capabilities not yet employed.
- Issue a certificate to verify that your data is protected/accessed in accordance with industry and Acronis best practices.

Benefits:

- Decrease maintenance costs by up to 20 percent by reducing the volume of support issues and the need to interact with Acronis.
- Eliminate gaps and better leverage Acronis' products using Acronis' audit report.

Acronis Audit Services ensures your environment is protected as you scale your infrastructure, introduce new business applications, and execute migration or integration projects.
