

Mirva consolidates cybersecurity and backup operations with **Acronis** to deliver secure, scalable IT services

Swedish MSP unifies backup, cybersecurity and service delivery through a single platform — enhancing efficiency, visibility and client trust.

Mirva, an MSP with offices across Stockholm, Uppsala, Gävle and Sundsvall, specializes in delivering cloud, infrastructure, security and consulting services. Mirva needed a reliable, scalable solution to simplify operations and strengthen cybersecurity. The company turned to Acronis to unify backup and cybersecurity management on a single platform.

Mirva partnered with Gridheart, a Sweden-based cloud distributor and Acronis partner, to support implementation and ongoing operations. Gridheart provided technical expertise, simplified billing and local-language support, ensuring smooth deployment and long-term success.

THE SOLUTION

Mirva chose Acronis for its integrated backup and cybersecurity platform, gaining centralized visibility across servers, endpoints and Microsoft 365. The unified interface reduced tool switching, improving efficiency and streamlining workflows.

THE IMPACT

- Streamlined operations by consolidating multiple tools with one unified platform.
- Improved technician efficiency and reduced administrative overhead.
- Enhanced visibility and control across all client environments.
- Strengthened cybersecurity posture with natively integrated cyber protection.

KEY CHALLENGES:

- Fragmented systems required technicians to switch between multiple platforms, reducing operational efficiency.
- Lack of integration between tools created risks and reduced visibility across client environments.

KEY REQUIREMENTS:

- A scalable, unified platform to manage backup, cybersecurity and endpoints from a single interface.
- Simplified operations with improved visibility across all client environments, including servers, endpoints and Microsoft 365 in a unified user interface.

wirva

“What made the difference was Acronis managed to gather all functionality into one system. We no longer had to jump between different platforms or adapt to different logics. Everything is connected, making it easier and safer.”

— Tomas Bergman, Business Manager at Mirva
