Acronis
Audit Services

FOR SERVICE PROVIDERS

Decrease maintenance costs and enjoy peace of mind knowing your customers' data is protected in accordance with industry and Acronis best practices. Our experts can audit your deployment to identify potential gaps, recommend changes, and decrease maintenance efforts and the risk to your business operations.

Acronis can discover how you can ensure business continuity and provide recommendations to improve the protection of your customers' data:

- Understand your support process, reporting requirements, billing requirements, and Service Level Agreements (SLAs).
- Audit your deployment of Acronis products and integration with third-party systems.

- Recommend changes to your deployment architecture and third-party systems integration approach and help leverage product capabilities not yet employed.
- Issue a certificate to verify that your data is protected/accessed in accordance with industry and Acronis best practices.

Benefits:

- Decrease maintenance costs by up to 20 percent by reducing the volume of support issues and the need to interact with Acronis.
- Eliminate gaps and better leverage Acronis' products using Acronis' audit report.

Acronis Audit Services ensures your environment is protected as you and your customers scale their infrastructures, introduce new business applications, and execute migration and integration projects.
