

Acronis solutions for hosting

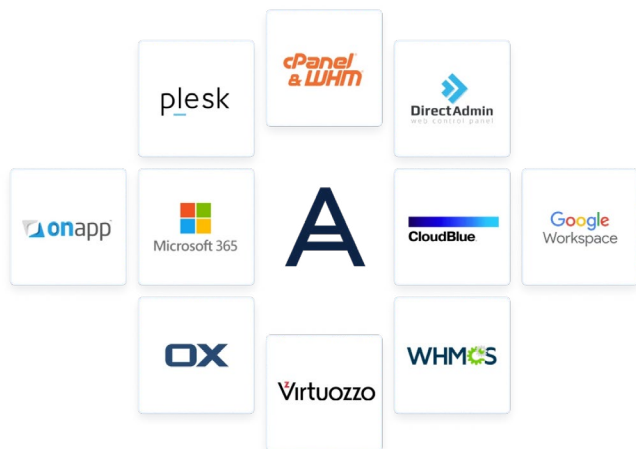

Cyber protection designed for service providers

Acronis enables hosting service providers to protect data, applications, websites, and systems, and deliver solutions that are profitable and ready to deploy across networks and clouds — any configuration you need. Your data will be protected, managed and deployed through deep integrations with the control panels and automation tools you use today. You can even create bundles and add-ons that protect email and endpoint devices.

Your customers will experience lower cyber risks and the ability to recover rapidly. Acronis cyber protection builds value, increases confidence, and removes complexity — bringing this together via one agent, one license, and one console.

DEEP INTEGRATIONS WITH MORE POPULAR TOOLS AND PLATFORMS

Integrating the best solutions matters. Acronis solutions were designed to support cloud and hosting use cases. This means complete cyber protection for cloud and hosting that is ready to deploy. And it's easy to create bundles and upsell products that work right out of the box.

Acronis

COMPLETE, MODERN CYBER PROTECTION

Protect your entire infrastructure from cyberthreats and data loss and achieve data sovereignty objectives using a single pane of glass on a platform designed by hosters specifically for hosting.

ENABLE PREMIUM BUNDLES WITH HIGHER MRR

Build upon Acronis Cyber Protection to create bundles and add-ons that enable customers to access premium protection for their data, applications, websites, and systems.

DEPLOY SEAMLESSLY

Acronis Cyber Protect Cloud is ideal for hosting and cloud with deep integrations into the control panels and automation systems you use today.

EXTEND CYBER PROTECTION

Extend your cyber protection solutions out to customer environments — protecting the data, applications, and systems of their teams.

BUILT BY POSTING PROS FOR HOSTING PROS

Comprehensive and modern

Replace legacy backup and security solutions that are inadequate to defend against modern threats.

Differentiate offerings

Stay competitive by differentiating service offerings, bundles, and add-ons. Capture new revenue streams that increase MRR and ARPU.

Self-service and faster MTTR

Reduce burden on internal support teams through a self-service

portal, and achieve faster mean time to ticket resolution (MTTR) on agent tickets with a single solution protecting all workloads. Faster resolutions mean higher customer satisfaction and retention.

Reduced complexity

Eliminate the need for multiple solutions to cover backup, recovery, and security.

All environments and workloads

Supports all cloud and hosting environments — from shared and VPS to dedicated and cloud — and all Operating Systems (OSes).

Designed to scale

The more systems protected, the more efficient it becomes.

GDPR and data sovereignty

Whether served from one of Acronis' 40+ data centers worldwide or deployed on premises, Acronis' hosting solutions are an effective part of geographic data sovereignty compliance.

All hosting environments

Supports all cloud and hosting environments — from shared and VPS to dedicated and cloud.

BRINGING IT ALL TOGETHER

The hard work of managing and securing cloud and hosting infrastructure takes place behind the scenes. When everything goes right, no one notices. But when something goes wrong, it's a different story.

Acronis enables cloud and hosting service providers to deliver cyber protection solutions that protect your data, are profitable, and ready to deploy across your networks, in hyperscale clouds, and even on your customers' email and endpoint devices — as much as you need.

Your systems are safer. And your customers experience lower cyber risks and access solutions via a self-service portal and deep integrations with the control panels and billing systems you use today. Acronis cyber protection increases confidence and removes complexity — bringing this all together in a single pane of glass.
