Acronis

ACRONIS® BACKUP ADVANCED
FOR SHAREPOINT

KEY FEATURES

- Identify and protect all the servers in your SharePoint farm
- Capture your SharePoint environment quickly with a single-pass image-based backup
- Back up to local disk, network share, tape, and cloud storage
- Easily browse and recover site content directly from the backup
- Quickly recover a single item, file, database, server or SharePoint farm
- Restore backups to the SharePoint site, a file, or to the native SharePoint export format

BENEFITS

- A powerful, yet affordable solution powered by the Acronis AnyData Engine
- Fast, easy backup improves IT productivity
- Hybrid protection improves disaster recovery and helps ensure business continuity
- Modular architecture lets you add on additional products as your business grows
- Centralized management and reporting eases IT administration
- Complete yet easy to install, configure, and manage

Acronis Backup Advanced for SharePoint is the best solution for protecting Microsoft® SharePoint® environments – even those with complex farm configurations. Powered by the Acronis AnyData Engine, Acronis' single-pass backup lets you quickly and easily backup your SharePoint farm and restore a complete farm, individual servers, individual databases, workgroups, files, and items – all from the same backup.

The Acronis AnyData Engine is the core suite of technology that powers all Acronis new generation data protection products to capture, store, recover, control, and access data in virtual, physical, cloud, and mobile environments. Fueled by over 100 patents, its modular architecture lets you use one or more Acronis products, each individually designed and optimized for a specific workload. For example, Acronis Backup Advanced for SharePoint is designed and optimized for the protecting your Microsoft SharePoint servers and farms.

The Acronis AnyData Engine also lets you add and blend additional Acronis products as your technology infrastructure evolves - without replacing any components. Use the same unified console to configure, install, and maintain each product. If you have more than one Acronis product, use the Acronis Management Server (AMS) - a single pane-of-glass that lets you easily manage the backup and recovery of all data across multiple Acronis products, including Acronis Backup Advanced for SharePoint.

BEST BACKUP FOR MICROSOFT SHAREPOINT

Single-Pass Backup for SharePoint - Acronis' patented disk image technology unites disk and SharePoint component backups into one high-performance, efficient solution, capturing databases, application, and the operating system at one time.

Reliable SharePoint Farm Protection - Acronis automatically identifies and protects all the servers in your SharePoint farm, ensuring your critical data is protected and recoverable even when the farm configuration changes.

Granular SharePoint Recovery - Quickly recover a single item, file, database, complete server, or your entire SharePoint farm with Acronis' user-friendly interface, designed specifically for SharePoint recovery.

Easy Data Browsing - Browse and recover site content directly from the backup, making data recovery fast and easy.

Flexible Recovery Destinations - Restore backups to the SharePoint site, to a file, or to the native SharePoint export format, making recovery a quick and easy process.

MORE FEATURES

- **Hybrid Protection** - To provide the multiple levels of protection you need in the event of a disaster, Acronis stores backup copies in up to five different locations locally and in the cloud – including Acronis Cloud.

- **Encryption** – The Acronis AnyData Engine encrypts data, in transit and in rest, using military grade AES-256 encryption, helping to protect your data from unauthorized access.

- **Incremental and Differential Backups** - Only backup the changes made, saving time and optimizing storage space and network, disk and system performance.

- **Compression and Deduplication** – With built-in block-level data deduplication and compression, backup data volumes are reduced by up to 90%, improving backup speed, reducing storage requirements, and optimizing WAN-based backups.

- **Disaster Recovery** - Recover your SharePoint server in minutes to the same location, to dissimilar hardware, or to virtual servers. Quickly restore data locally or remotely. In the event of hardware failure or natural disaster, recover an entire server in minutes with Acronis' fast bare-metal restore.

- **Modular Architecture** - The Acronis AnyData Engine's modular architecture lets you add more Acronis Backup Advanced products to your core solution at any time. Get the product that you need today and as your business grows, get more Acronis Backup Advanced products to protect your new physical servers, workstations, or hypervisor platforms without having to install a completely new backup environment.

- **Centralized Management** - Manage all physical and virtual machines locally or remotely with the Acronis Management Server. Assign backup plans to one or more machines, review status updates, generate reports, and receive alerts – all from a single console.

Supported Operating Systems:

- Windows Server 2012/2012 R2, 2008/2008 R2, 2003/2003 R2
- Windows Small Business Server 2011, 2008, 2003/2003 R2
- Windows MultiPoint Server 2012, 2011, 2010
- Windows Storage Server 2012/2012 R2, 2008/2008 R2, 2003
- Windows 10, 8/8.1, 7

Supported Microsoft SharePoint Versions:

- Microsoft SharePoint 2013
- Microsoft SharePoint Server 2010 SP1
- Microsoft SharePoint Foundation 2010 SP1
- Microsoft Office SharePoint Server 2007 SP2
- Microsoft Windows SharePoint Services 3.0 SP2

Supported Storage Media:

- Local disks - SATA, SCSI, IDE, RAID
- Networked storage devices - SMB, NFS, iSCSI, FC, FTP
- Tape drives, autoloaders and tape libraries
- Optical media - CD, DVD, HD-DVD, Blu-Ray
- Removable media - ZIP®, Rev®, RDX®, etc.
- External HDDs and SSDs - USB 3.0/2.0/1.1 and IEEE1394 (Firewire)
- Private, Hybrid and Public Cloud Storage - FTP, SFTP
- Acronis Cloud Storage
