

# Abolis Biotechnologies strengthens data protection with **Acronis**

Based in Evry, France, Abolis Biotechnologies is an innovation-driven company focused on developing sustainable industrial solutions using micro-organisms.

Serving industries such as food, healthcare, cosmetics and chemistry, the company helps organizations transition toward more environmentally responsible practices.

As its operations expanded, Abolis recognized the need for a more robust and professional approach to data protection.

## THE SOLUTION

Abolis Biotechnologies adopted backup in Acronis Cyber Platform following a recommendation from a partner.

The company replaced its fragmented internal tools with a unified, reliable platform designed to simplify backup and recovery operations. Backup capabilities in Acronis Cyber Platform provided centralized management, improved system coverage and enhanced data protection capabilities.

## THE IMPACT

- Successfully restored data after accidental deletions, modifications and technical incidents.
- Improved confidence in data recovery processes.
- Strengthened overall data security.
- Streamlined backup and restoration workflows.

## KEY CHALLENGES:

- No professional backup and recovery solution in place.
- Reliance on in-house scripts and Synology tools.
- Incomplete data protection, especially for endpoint devices.
- Increasing need for stronger security and reliability.

## KEY REQUIREMENTS:

- A centralized, professional backup solution.
- Full coverage across systems, including endpoints.
- Stronger data security with encryption.
- Simplified and streamlined backup and recovery processes.

# ABOLIS

“Acronis Backup has proven to be a reliable and effective solution. We have successfully restored data following accidental modifications, deletions and technical incidents.”

— Dr. Zahen Malla Osman, Head of the Computer Science Department at Abolis Biotechnologies
