

Acronis

Acronis MDR

Powered by a Leading Cybersecurity Ecosystem

Are your clients truly protected? What about their data?

The threat landscape is getting more sophisticated.

- 60% of breaches bypass traditional detection-only technologies.
- AI makes cybercriminals more dynamic.

MSPs starting or growing their security practice

should consider adding advanced security services to their tech stack.

- Address sophisticated threats like zero days and APTs.
- Couple advanced detection and response services (EDR/XDR/MDR) with true business resilience without introducing another management console.
- Optimize resource allocation through outsourced excellence.

An MDR built for MSPs to deliver security expertise, unmatched business resilience, and rapidly expand multiple compelling service offerings to clients.

- **24/7/365 world-class SOC, delivered by a certified partner.**
- **Best-of-breed remediation, including recovery.**
- **Prioritized threat visibility in a single platform for all your services.**

Acronis MDR: Top 5 use cases

- 1

Amplify effectiveness and optimize resource allocation
 - Monitoring and support delivered by an expert SOC.
- 2

Identify and block attacks before breach
 - Block common threats with award-winning endpoint protection.
 - Detect and respond to advanced threats via rapid, deep analysis by security experts.
- 3

Proactive response
 - Event triage, prioritization, real-time alerting.
 - True business continuity with seamless remediation and recovery.
- 4

Enable compliance and cyber insurance
 - Continuous incident reporting.
 - Data and incident correlation for compliance reporting.
- 5

Consolidate solutions
 - Rapidly launch and scale multiple services including cybersecurity, data protection and endpoint management.
 - Single platform to reduce TCO by up to 60% with unified service management.

How Acronis MDR delivers rapid investigation and response, scalable across varying clients

Effortless provisioning	Continuous monitoring	Alert prioritization and expedited investigation	Standard	Seamless, integrated recovery
Provision service with a single click. An outsourced SOC handles the rest.	Peace of mind from a world-class, outsourced SOC.	Outsourced incident investigation and prioritization leveraging rich telemetry, threat intelligence and forensic experience.	Real-time alerting, detailed analysis and instantaneous response.	Unmatched business resilience via integrated remediation and restoration.

Choose the service that matches your resource availability and that meets your client’s needs

Acronis MDR is offered in two tiers:

- Standard** — Simplify endpoint protection and amplify your team’s security effectiveness.
- Advanced** — Fully outsource endpoint security operations for peace of mind and business resilience.

Included	Standard	Advanced
MDR onboarding	✓	✓
24/7 support by an outsourced SOC	✓	✓
24/7/365 monitoring to identify cyberthreats	✓	✓
Event triage and prioritization with real-time alerting	✓	✓
Rapid cyberthreat detection and isolation by SOC team	✓	✓
Guidance for how to mitigate, stop and prevent security incidents	✓	✓
Detailed multichannel security escalations (inproduct, email, phone)	✓	✓
24/7 security threats remediation by MDR team	✗	✓
Outsourced attack rollback and recovery from backups (requires agreement with MSP)	✗	✓
Endpoint risk profile assessments	✗	✓
