Acronis Consulting Services
FOR THE ENTERPRISE

Do you have a diverse IT environment with strict business continuity requirements? Do you want to recover your data quickly, get back to an operational state fast, and ensure you meet your Service Level Agreements (SLAs)?

Leverage Acronis' experience and shorten the time it takes to gain value from your investment in Acronis products. Our consultants can build a fast and effective deployment plan that mitigates the technology risks for your business.

Acronis can discover how you can ensure business continuity and develop an optimal protection approach to help you:

· Understand how your business operates and determine Recovery Point and Recovery Time Objectives (RPOs and RTOs) to ensure business continuity.
· Discover network and equipment specifics, as well as potential points of failure in your environment.

· Determine the best approach to integrate the service into your IT landscape to support provisioning automation and export, monitor, and report on data.
· Design the solution in line with collected requirements and in accordance with industry and Acronis best practices.

Get assistance during solution implementation:

· Get real-time access to consulting expertise beyond standard support for product installation/configuration and meet your required data protection policies.
· Get access to Acronis experts while implementing in-depth system integration, migration, and other complex scenarios.

Benefits:

· Cut the time to implement the solution and/or integrate with third-party systems by 30 percent.
· Receive comprehensive design documentation and software requirement specifications for future reference.

· Realize up to a 20 percent lower Total Cost of Ownership (TCO):
  ◦ Onboard new staff quickly and resolve issues faster with comprehensive architecture documentation at hand that describes how to better mitigate problems with operating system setup, networking issues, etc. and identify and resolve the root cause of problems.
  ◦ Reduce the number of support incidents with better trained internal staff.

Acronis employs the best data protection, security, and systems integration experts who collaborate with your IT team to help them better understand your environment, build complex data protection solutions, migrate from legacy backup solutions, transfer historical data, and more. We can also support you during implementations to ensure fast and efficient deployment.
