

# SEVEN secures cross-functional operations with Acronis

Holding company boosts efficiency with remote management.

SEVEN is a French holding company that facilitates cross-functional management for approximately 15 companies across Europe. The company coordinates different teams within companies to work toward the same goal. SEVEN manages IT, accounting, legal and quality control for clients, with subsidiaries operating in diverse sectors such as carpentry, construction, hospitality, and catering.

SEVEN needed a backup solution and turned to Acronis Cyber Protect. With Acronis, SEVEN now has reliable and manageable backup for its critical data.

## THE SOLUTION

SEVEN adopted the backup solution in the Acronis Cyber Protect platform. The ability to integrate Hyper-V backup option to align with SEVEN's new server architecture was a major advantage.

## THE IMPACT

- Ability to perform backups and restore files effectively.
- Access to detailed logs provides insight into backup operations.
- The solution offers accessibility from anywhere, enhancing management flexibility.

## KEY CHALLENGES:

- SEVEN needed antivirus and firewall solutions to protect its data.
- The company, recognizing that any system carries inherent risks, sought a robust backup solution to restore data in case of crashes or malicious activities.
- Initially, SEVEN did not operate its own servers, but a dedicated backup solution became essential when the company acquired its own servers.

## KEY REQUIREMENTS

- A flexible and fast method to recover data A reliable backup solution capable of restoring data after system failures or malicious incidents.
- A backup solution compatible with the company's new server infrastructure, specifically with Hyper-V.

SEVEN adopted Acronis Cyber Protect based on another company's positive experience.
