Acronis

Acronis Cyber Cloud Integration with OnApp

Simplified Backup Management for Service Providers and End Users

Acronis provides a native backup plugin for OnApp, enabling self-service backup and restore for both service providers and end-users. The solution offers protection of Windows and Linux virtual servers on Xen/KVM and VMware hosts.

Benefits for Service Providers

It's easy to fully manage the Acronis Cyber Cloud backup service directly from the OnApp interface, including:

- Customer provisioning
- Agent deployment
- Backup and restore management
- Billing

Benefits for End-users

Users can get full self-service backup and restore capabilities using the plugin, including:

- Agent deployment
- Backup and restore management
- Single sign-on to the Acronis Backup console for extended service management
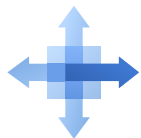

ACRONIS CYBER CLOUD FOR SERVICE PROVIDERS

Acronis Cyber Cloud is a platform that enables service providers to deliver cyber protection in an easy, efficient and secure way.

- Differentiate your offering with next-gen data protection
- Offer cutting-edge anti-ransomware technologies—at an affordable price
- Reduce churn with easy upsell and cross-sell opportunities
- Shorten proof of concept and deployment stages with a ready-to-use cloud solution
- White-label your services to increase brand value
- Reduce management overhead with a single unified console
- Expand the total addressable market with support for 22 platforms
- Exceed customer service level agreements (SLAs) with backups that are twice as fast as the competition

KEY DATA PROTECTION FEATURES

 Deliver the Acronis Cyber Cloud backup service quickly and efficiently

 Deploy agents to virtual servers automatically

 Perform manual or automatic backups per the desired schedule and frequency

 Restore an entire virtual server

 Restore any file on any system granularly, eliminating the need to acquire specialized software
