## Cyber Protect Cloud integration with Citrix Workspace

### Complete cyber protection for virtual workspaces

#### WHAT'S THE IMPORTANCE?

The amount of sensitive corporate data being accessed by workloads outside organizational control is on the rise. So is the attack surface that the IT team has to safeguard. What's worse, due to the increased sophistication of modern cyberthreats, any access point can be vulnerable to malware attacks that can destroy or alter files and inject malicious code.

In response to this complex reality, Citrix – a leader in remote workspaces – and Acronis – a leader in edge and endpoint cyber protection – have joined forces to better address today's complex and evolving cyberthreat landscape, while reducing the complexity for clients and their own operations.

#### GAIN THE ACRONIS-CITRIX WORKSPACE ADVANTAGE

The integration of Acronis Cyber Protect Cloud with Citrix Workspace, made possible through the APIs and SDKs of the Acronis Cyber Platform, adds advanced cybersecurity capabilities that enhance Citrix's existing privacy and security measures. As a result, Acronis Cyber Protect Cloud secures endpoints with real-time protection that uses AI-based static and behavioral heuristics, as well as on-demand antivirus, anti-ransomware, and anti-cryptojacking technologies to prevent direct attacks against the Citrix Workspace app.

#### ABOUT ACRONIS CYBER PROTECT CLOUD

The only single-agent solution that natively integrates cybersecurity, data protection, and management to protect endpoints, systems, and data.

#### THE WORLD'S BEST BACKUP AND RECOVERY

Full-image and file-level backup and recovery safeguard workloads on more than 20 platforms – with near-zero RPOs and RTOs.

#### ENHANCED WITH ESSENTIAL CYBER PROTECTION AT NO ADDITIONAL COST

Advanced AI-based behavioral detection engine stops malware, ransomware, and zero-day attacks on client endpoints and systems.

#### PROTECTION MANAGEMENT BUILT FOR SERVICE PROVIDERS

Enable thorough post-incident investigations and proper remediation, while keeping costs down by collecting digital evidence and storing it in a secure central repository.

## COMPLETE CYBER PROTECTION WITH ACRONIS CYBER PROTECT CLOUD

### Improved productivity

Citrix Workspace empowers productivity by promoting an engaged workforce and flexible experience for businesses. With a single pane of glass for all cyber protection functionalities, auto-discovery of devices, and remote agent installation, Acronis Cyber Protect Cloud adds visibility and simplifies interactions. Increase performance with antivirus scans of backups, reduce downtime with fail-safe patch management, and boost automation with auto-allowlisting, and agent-less backups for Citrix virtual environments.

### Strengthened security

Acronis and Citrix complement each other to strengthen your resilience and enable you to deliver the security clients are looking for at every layer of the workspace technology stack. Easily identify risks and improve security by assessing a device's protection status with built-in #CyberFit scoring. Get industry-leading, next-generation continuous data protection of user profiles, applications, files, and best in class malware and ransomware prevention, detection, and recovery to mitigate any risk of data loss and downtime.

### Extended intelligence

Leverage the power of Acronis-Citrix joint intelligence to transform your digital workspace. With smart protection plans based on Acronis threat alerts, AI/ML-based threat detection and behavior analysis, hard disk drive failure prediction, and fast and precise investigations with forensic-rich backups, you can achieve a comprehensive defense for every level of the cyber protection framework.

## DEDICATED GO-TO-MARKET AND TECHNICAL SUPPORT

Get pre- and post-sales support from a designated team of marketing and sales specialists, by enrolling in the Acronis #CyberFit Partner Program. Designed to help you thrive, the partner program also grants you access to an all-new Partner Portal and exclusive training and certification courses. Additionally, you can rely on Acronis technology experts and business consultants to help you build an efficient business case, design your cyber protection plan, and quickly roll out services with minimal risk and costs.
