

# Microsoft 365 backup with **Acronis** Cyber Protect Cloud

Secure, reliable and easy-to-use Microsoft 365 protection built for MSPs. Now with unlimited Acronis Hosted Cloud Storage

## Acronis

### Why third-party Microsoft 365 backup is critical

Microsoft 365 is rapidly becoming the go-to productivity solution for many companies. More than 400 million active monthly users rely on Microsoft 365, according to Microsoft. Meanwhile, many of them still operate under a dangerous misconception that Microsoft provides full-fledged data protection for Microsoft 365. While Microsoft provides infrastructure resilience and high availability, data protection remains the customer's responsibility. Without third-party backup, sensitive business data such as emails or shared files stored in Microsoft 365 are not protected from data loss issues. This includes Entra ID.

Regain control with Acronis Cyber Protect Cloud for Microsoft 365. It provides a secure cloud-to-cloud backup solution that helps you safeguard your Microsoft 365 data, reduce expenses and ensure business continuity.

### Microsoft 365 backup with Acronis Cyber Protect Cloud

**Access backed-up Microsoft 365 data quickly with powerful search capabilities**

**Maintain compliance with legal and regulatory mandates**

**Ensure business continuity and meet shorter RTOs (recovery time objectives)**

**Protect Microsoft 365 data from accidental deletions and a wide range of cyberthreats**

### Why Acronis Cyber Protect Cloud for Microsoft 365?

#### Agentless SaaS backup

Ensure your clients' Microsoft 365 data is backed up and recoverable with best-in-class, cloud-to-cloud agentless backup and recovery technologies.

#### Integrated security

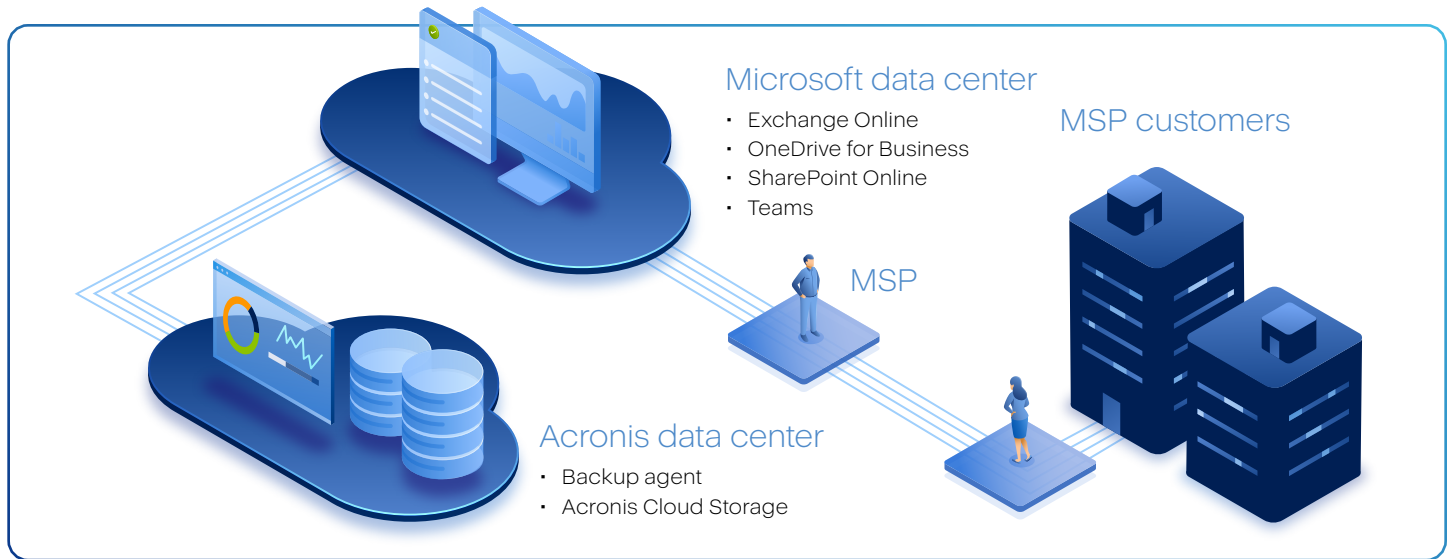

Enhance data protection with integrated email and endpoint security. Intercept and stop email threats, including business email compromise (BEC), zero-day malware and Advanced Persistent Threats (APTs).

#### One console to protect 30+ workload types

A single console for backup, endpoint security and endpoint management for all customer workloads, including Microsoft Exchange, Microsoft SQL Server, MariaDB, MySQL, Oracle DBMS Real Application Clusters and SAP HANA.

### Effortless SaaS solution — no installation or maintenance

Start quickly with no upfront costs and save on trainings and maintenance. With Acronis Cyber Protect Cloud you can back up client data from Microsoft data centers directly to highly secure Acronis data centers.

## Key features to protect your clients' Microsoft 365 data

### One solution for any workload

Save on licensing, education and integration. Acronis Cyber Protect Cloud is a scalable solution that protects any piece of clients' data across 30+ platforms—physical, virtual, cloud or mobile.

### Quick granular restore

Avoid client downtime and ensure their business continuity by recovering their data in seconds. You can granularly back up and restore required pieces of data (e.g. emails, files, sites, contacts, attachments).

### Group management for Microsoft 365 seats

Create static or dynamic groups based on your (Microsoft Entra ID) data and simplify protection management for multiple seats by eliminating the need to configure protection for each individual seat.

### Microsoft Entra ID backup and recovery NEW

Protect and recover critical identity data, including users, groups and directory configurations, to help reduce downtime and support business continuity.

### Adjustable backup frequency

Reduce RPO and improve business continuity by backing up your seats data up to six times per day.

### Automatic protection for new Microsoft 365 items

#### Quick backup search

Find a file in seconds. Enhanced search for mailboxes allows you to search by email subject, recipient, sender and date. Additionally, you can search with word forms or partial information and can also search Teams, OneDrive for Business and SharePoint Online by site item and file name.

#### Powerful status monitoring

Achieve higher levels of transparency and security thanks to advanced reporting capabilities and backup-status monitoring, including widgets, notifications and alerts for critical events.

#### Multilevel encryption

Safeguard your clients' data with additional security. At-source, enterprise-grade AES-256 encryption protects backups with irreversibly encrypted passwords.

## About Acronis

Acronis is a global cyber protection company delivering the only natively integrated cybersecurity, data protection, and infrastructure management platform for managed service providers and IT departments. Acronis solutions are designed to identify, protect, detect, respond, recover and govern IT deployments, ensuring data integrity and business continuity. Acronis is a Swiss technology company, founded in Singapore.
