

Microsoft 365 backup with **Acronis** Cyber Protect Cloud

Secure, reliable and easy-to-use M365 protection built for MSPs. Now with unlimited Acronis Hosted Cloud Storage

Why third-party Microsoft 365 backup is critical

Microsoft 365 is rapidly becoming the go-to productivity solution for many companies. More than 400 million active monthly users rely on Microsoft 365, according to Microsoft. Meanwhile, many of them still operate under a dangerous misconception that Microsoft provides full-fledged data protection for Microsoft 365.

While Microsoft provides infrastructure resilience and high availability, data protection remains the customer's responsibility. Without third-party backup, sensitive business data such as emails or shared files stored in Microsoft 365 are not protected from data loss issues.

Regain control with Acronis Cyber Protect Cloud for Microsoft 365. It provides a secure cloud-to-cloud backup solution that helps you safeguard your Microsoft 365 data, reduce expenses and ensure business continuity.

Acronis Cyber Protect for Microsoft 365 lets you work worry free

Access backed-up Microsoft 365 data quickly with powerful search capabilities

Maintain compliance with legal and regulatory mandates

Ensure business continuity and meet shorter RTOs (recovery time objectives)

Protect Microsoft 365 data from accidental deletions and a wide range of cyberthreats

Why Acronis Cyber Protect for Microsoft 365?

Agentless SaaS backup

Ensure your clients' Microsoft 365 data is backed up and recoverable with best-in-class, cloud-to-cloud agentless backup and recovery technologies.

Integrated security

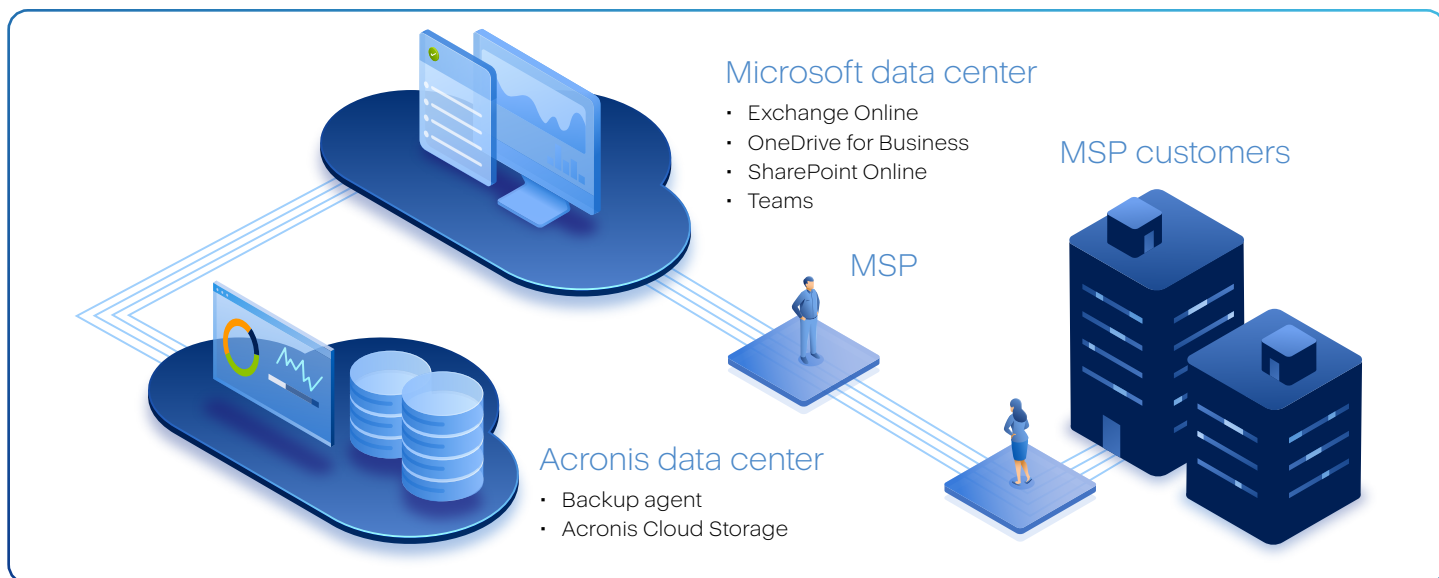

Enhance data protection with integrated email and endpoint security. Intercept and stop email threats, including Business Email Compromise (BEC), zero-day malware and Advanced Persistent Threats (APTs).

One console to protect 30+ workload types

A single console for backup, endpoint security and endpoint management for all customer workloads, including Microsoft Exchange, Microsoft SQL Server, MariaDB, MySQL, Oracle DBMS Real Application clusters, and SAP HANA.

Effortless SaaS solution — no installation or maintenance

Start quickly with no upfront costs and save on trainings and maintenance. With Acronis Cyber Protect Cloud you can back up client data from Microsoft data centers directly to highly secure Acronis data centers.

Key features to protect your clients' Microsoft 365 data

One solution for any workload

Save on licensing, education and integration. Acronis Cyber Protect Cloud is a scalable solution that protects any piece of clients' data across 30+ platforms—physical, virtual, cloud, or mobile.

Quick granular restore

Avoid client downtime and ensure their business continuity by recovering their data in seconds. You can granularly back up and restore required pieces of data (e.g. emails, files, sites, contacts, attachments).

Group management for Microsoft 365 seats

Create static or dynamic groups based on your Azure AD (Microsoft Entra ID) data and simplify protection management for multiple seats by eliminating the need to configure protection for each individual seat.

Adjustable backup frequency

Reduce RPO and improve business continuity by backing up your seats data up to 6 times per day. Automatic protection for new Microsoft 365 items.

Quick backup search

Find a file needed in seconds. Enhanced search for mailboxes allows you to search by email subject, recipient, sender, and date. In addition, you can search with word forms or partial information and can also

search Teams, OneDrive for Business and SharePoint Online by site item and file name.

Powerful status monitoring

Achieve higher levels of transparency and security thanks to advanced reporting capabilities and backup-status monitoring, including widgets, notifications, and alerts for critical events.

Multi-level encryption

Safeguard your clients' data with additional security. At-source, enterprise-grade AES-256 encryption protects backups with irreversibly encrypted passwords.

About Acronis

Acronis unifies data protection and cybersecurity to deliver integrated, automated [cyber protection](#) that solves the safety, accessibility, privacy, authenticity and security ([SAPAS](#)) challenges of the modern digital world. With flexible deployment models that fit the demands of service providers and IT professionals, Acronis provides superior cyber protection for data, applications, and systems with innovative next-generation antivirus, [backup, disaster recovery](#), and endpoint protection management solutions powered by AI.

Founded in Singapore and headquartered in Switzerland, Acronis now has over 2,000 employees and offices in 34 locations worldwide. Learn more at [acronis.com](https://www.acronis.com)
