Acronis Deployment Services
FOR THE ENTERPRISE

Do you have a diverse IT environment with strict business continuity requirements? Do you want to save IT cycles? Do you need to quickly roll out the solution?

If you need assistance with data protection, Acronis is here to help! With Acronis Deployment Services, you can focus on your primary business objectives and leave the discovery of threats, solution design, implementation, and configuration efforts to Acronis.

Acronis can discover how you can ensure business continuity and develop an optimal protection approach to help you:

- Understand how your business operates and determine Recovery Point and Recovery Time Objectives (RPOs and RTOs) to ensure business continuity.
- Discover network and equipment specifics, as well as potential points of failure in your environment.
- Determine the best approach to integrate the service into your IT landscape to support provisioning automation, export, monitor, and report on data.
- Design the solution in line with collected requirements and in accordance with industry and Acronis best practices.

Acronis can quickly deliver an end-to-end solution:

- Deploy and configure the solution to design specifications with minimal disruption to your business operations.
- Validate the solution against the test plan to ensure minimum risk to future operations.
- Train your IT and operations personnel to operate, configure, and troubleshoot problems with the solution.
- Ensure a smooth transfer of the solution to a production state and support collaboration enablement.

Benefits:

- Implement and integrate with third-party systems 50 percent faster.
- Receive comprehensive design documentation and software requirement specifications for future reference.
- Reduce IT workload to support your initial implementation by 30 percent.
- Realize up to a 20 percent lower Total Cost of Ownership (TCO):
  - Onboard new staff quickly and resolve issues faster with comprehensive architecture documentation at hand that describes how to better mitigate problems with operating system setup, networking issues, etc. and identify and resolve the root cause of problems.
  - Reduce the number of support incidents with better trained internal staff.

With Acronis Deployment Services, Acronis takes care of your data protection solution, including design, configuration, and implementation — regardless of the complexity of your IT infrastructure. Leveraging their experience from hundreds of successful data protection implementations, Acronis' technical experts can quickly deploy an optimized solution that fits into your organization's infrastructure and processes and ensures compliance with industry and government regulations. Acronis' portfolio of successful deployments ensures that all your data, applications, and systems across multiple platforms are protected, whether they reside on premises, in remote locations, in public and private cloud infrastructures, or on mobile devices.
