

Advanced Email Security

For Acronis Cyber Protect Cloud

Improve client security by intercepting modern email-borne attacks before it reaches end-users

Block email threats — including spam, phishing, business email compromise (BEC), account takeover (ATO), malware, advanced persistent threats (APTs) and zero days before they reach end-users' Microsoft 365, Google Workspace, or any cloud mailboxes or on-premises email servers. Leverage this next-generation, cloud-based email security solution for holistic protection with the highest detection rates and lowest false positives, combining speed, scale and agility.

Enhance your cyber protection services with cloud email security

Stop phishing and spoofing attempts

Minimize email risks for clients with powerful threat intelligence, signature-based detection, URL reputation checks, unique image recognition algorithms, and machine learning with DMARC, DKIM, and SPF record checks.

Catch advanced evasion techniques

Detect hidden malicious content by recursively unpacking attached or embedded files and URLs, separately analyzing each with dynamic and static detection engines - performing deep scanning of 100% the content.

Prevent APTs and zero-day attacks

Prevent advanced threats that evade conventional defenses with Perception Point's unique CPU-level technology, which blocks exploits before the malware is released and delivers a clear verdict in seconds.

UNLOCK NEW REVENUE STREAMS	PROTECT YOUR CLIENTS' #1 THREAT VECTOR FROM MODERN EMAIL ATTACKS	CONSOLIDATE AND STREAMLINE YOUR SERVICES WHILE SAVING TIME AND RESOURCES
<ul style="list-style-type: none"> Expand or enhance your stack of services with email security Start planning the upgrade of your services without worrying about the time needed to implement – Advanced Email Security is enabled with the flip of a switch 	<ul style="list-style-type: none"> Minimize the risks to clients when they communicate via email and stop threats before they reach end-users' Microsoft 365, Google Workspace, or on-premises mailboxes Stop modern email threats, including spam, phishing, business email compromise (BEC), account takeover (ATO) spoofing, malware, malicious URLs, zero days, and advanced persistent threats (APT) in mere seconds with zero false positives 	<ul style="list-style-type: none"> Manage a single solution that integrates email security, backup, disaster recovery, next-generation anti-malware, and cyber protection management – reducing resources needed to deliver services Cut costs by consolidating solutions

<ul style="list-style-type: none"> Enhance your margins, profitability, and business plan to secure additional revenue streams Leverage consumption-based pricing 	<ul style="list-style-type: none"> Enable auditing and security investigations with a comprehensive audit log Cover 100% of traffic in real time - analyze every bit of content at any scale Don't disrupt processes and ensure minimum delays - receive clear verdict within 10 seconds on average with near-zero false positives, compared to 7-20 mins for sandboxing solutions Build your services on top of industry-leading technology in independent evaluations (SELabs) 	<ul style="list-style-type: none"> Eliminate the complexity of email security deployment and reduce deployment times to a few minutes, without the need for additional configurations Gain increased visibility over all email security alerts and incidents Empower your service delivery and security pros teams with direct access to cyber analysts and email security experts

Protect your clients' riskiest communication channel with unmatched Protection technologies

Spam filter

Block malicious communications with anti-spam and reputation-based filters, leveraging the combined data of several market-leading technologies.

Anti-evasion *Unique

Detect malicious hidden content by recursively unpacking the content into smaller units (files and URLs) which are then dynamically checked by multiple engines in under 30 seconds - much faster than the 20+ minutes of legacy sandboxing solutions.

Threat intelligence

Stay ahead of emerging threats with the combined threat intelligence of six market-leading sources and Perception Point's unique engine that scans URLs and files in the wild.

Static signature-based analysis

Identify known threats with best-of-breed signature-based antivirus engines enhanced with a unique tool by Perception Point to identify highly complex signatures.

Anti-phishing engines *Unique

Detect malicious URLs based on four leading URL reputation engines

in combination with Perception Point's advanced image recognition technology to validate the legitimacy of URLs.

Anti-spoofing

Prevent payload-less attacks such as spoofing, look-alike domains, and display name deception with unmatched precision through machine-learning algorithms with IP reputation, SPF, DKIM, and DMARC record checks.

Next-generation dynamic detection *Unique

Stop advanced attacks such as APTs and zero-days with Perception Point's unique, CPU-level analysis that detects and blocks them at the exploit stage by identifying deviations from normal execution flow during runtime.

Incident response service

Gain direct access to cyber analysts who act as an extension of your service delivery team. Monitor all customer traffic and analyze malicious intent with ongoing reporting and support, including handling false positives, remediating, and releasing when required.

Proven regulatory compliance

PART OF ACRONIS CYBER PROTECT CLOUD

Advanced Email Security is one of several advanced protection packs for Acronis Cyber Protect Cloud, which unifies cybersecurity, data protection and endpoint protection management in one integrated solution designed for service providers. Each advance pack enables service providers to extend their services with enhanced capabilities to meet client needs, ensuring the optimum level of cyber protection for every workload.
