

# Top 4 ways businesses can benefit from Acronis EDR

## Detect and block attacks before a breach

**65%**  of breaches involve some form of hacking

Source: Verizon DBIR 2022

Such attacks can bypass traditional endpoint defenses, like anti-malware

## Respond before damage is done

**\$4.45 million**  
Avg. cost of a data breach

Source: "Cost of Data Breach" Report, IBM & Ponemon Institute, 2023

Prevent breaches from doing damage. Minimize the cost with a rapid and holistic response via a single click, incl. recovery.

## Enable cyber insurance and compliance

**99%**  
of all cybersecurity insurance claims came from SME companies

Source: NetDiligence, 2023

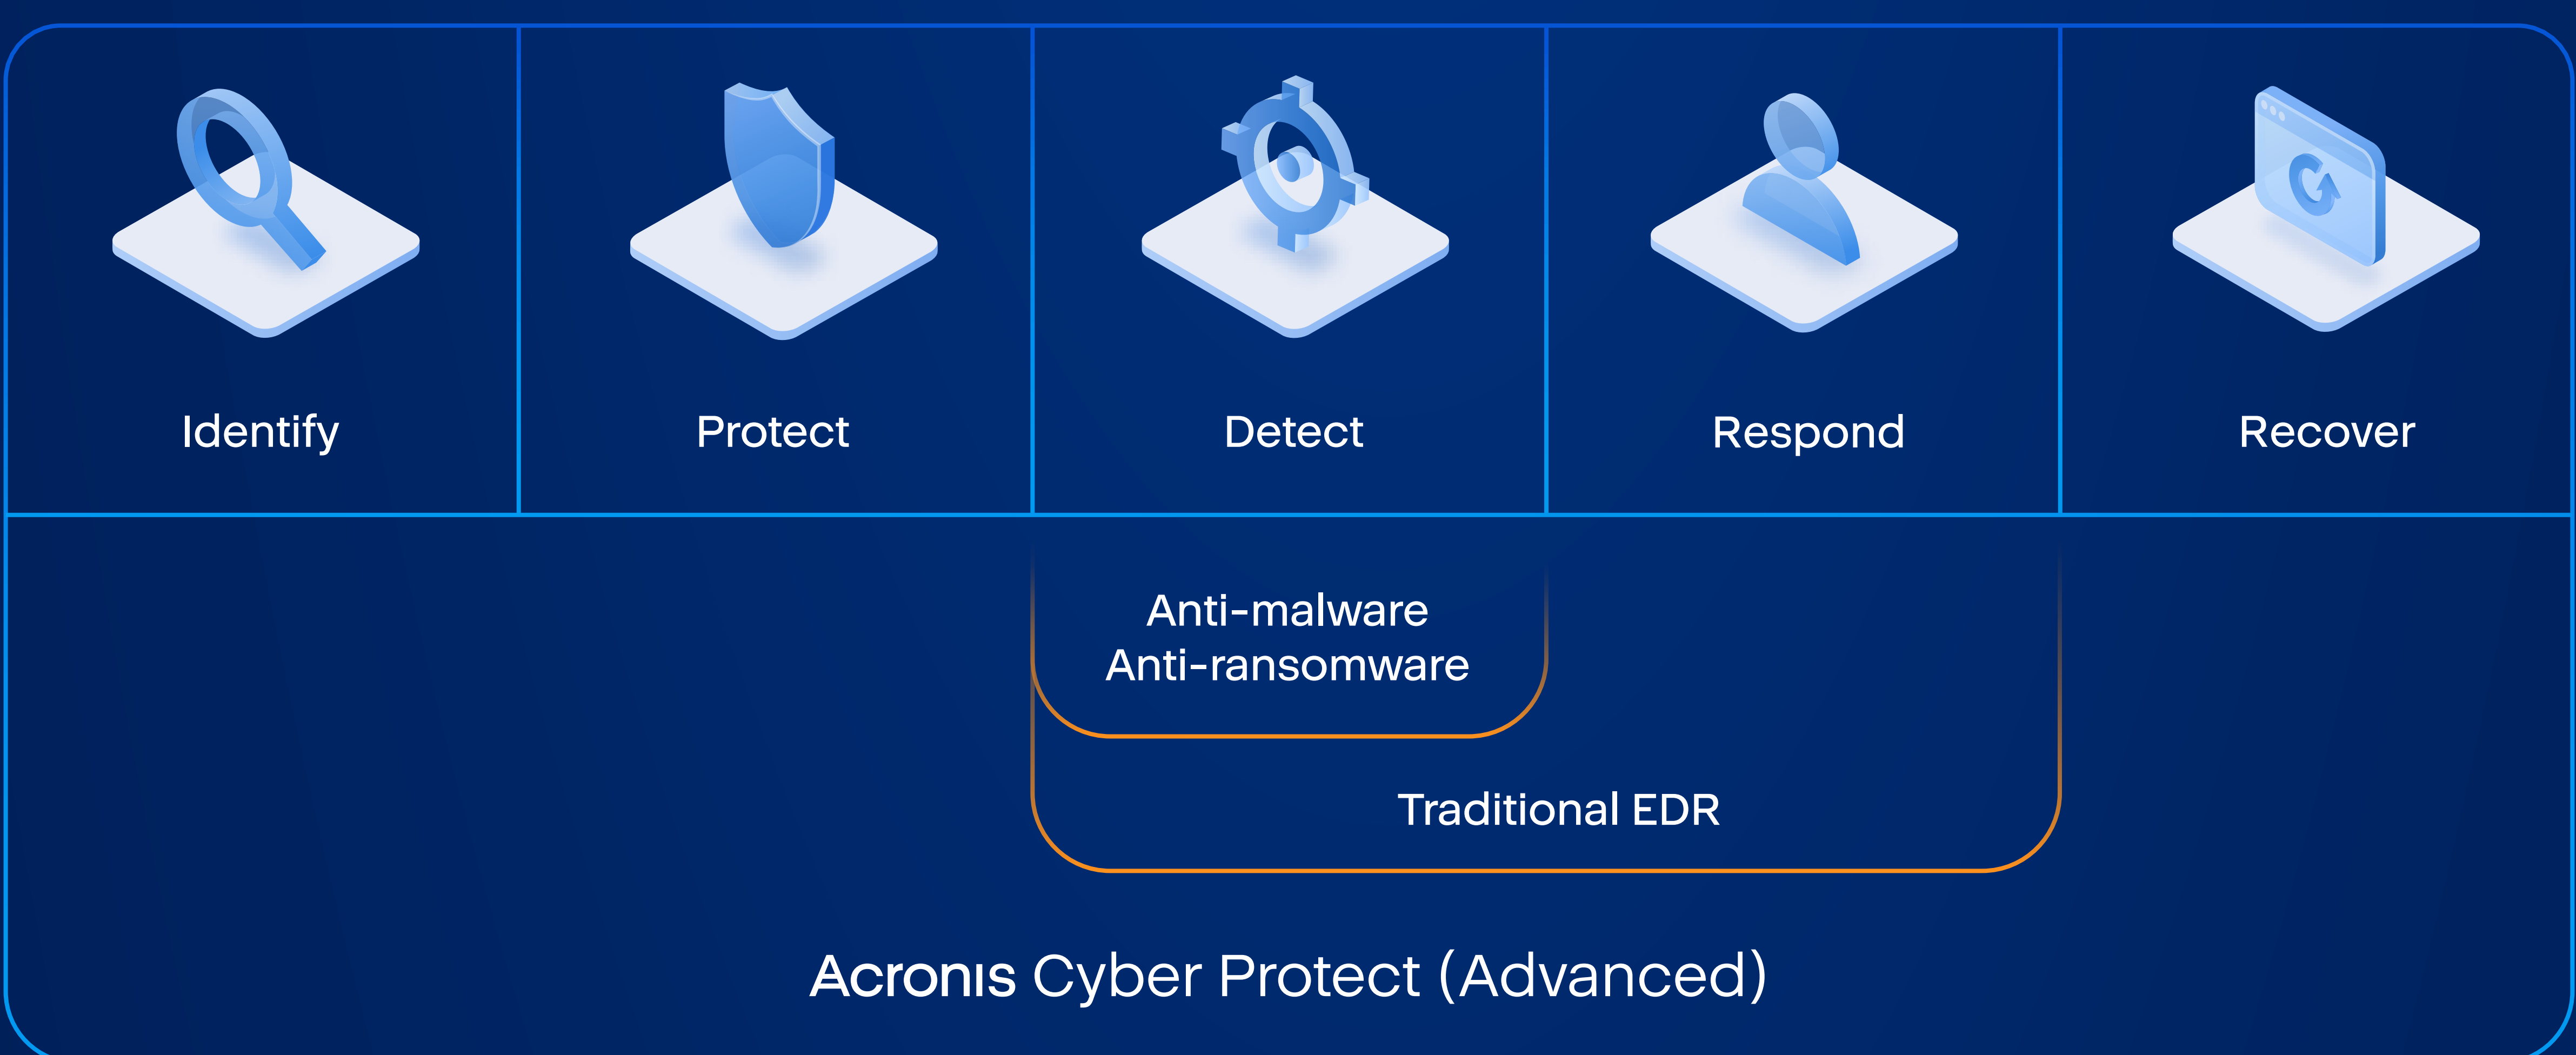

Cyber insurers require advanced endpoint protection controls like EDR. Our streamlined analysis and reporting enable you to report on incidents involving sensitive data in a timely manner and in compliance with regulations.

## Holistic protection without solution sprawl

**Organizations now have 76 security tools to manage on average**  
Unlike point solutions, Acronis EDR is focused on both stopping and remediating threats, and also ensuring your vulnerable assets are identified and proactively remediated. In addition, your business continuity is maintained, along with integrated recovery and endpoint management capabilities.
