Integration of third-party tools and services — CyberApps

Acronis

Consolidating tools and services into one platform is desirable for most MSPs. It helps gain visibility and control to prevent, catch, respond to and quickly recover from incidents. Using integrations, MSPs also report up to 30% efficiency gains, reduced costs and improved service quality.

Acronis offers MSPs the most complete platform to protect your customers' users and workloads with natively integrated monitoring and management, detection and response and backup and recovery, with built-in ticketing and billing.

The CyberApp integration framework enables you to incorporate any third-party tools or services as needed. Your vendors — our technology partners — have built many inbound integrations, so you can simply activate the CyberApps you need, unify your tools in one platform and enjoy a native user experience at no additional cost.

Third-party integration scenarios in Acronis platform:

Provision tenants
Create a customer tenant in the Acronis platform from a third-party product, or vice versa, provision tenants from Acronis into other tools and services.

Synchronize devices and users and add devices
Keep device and user information in sync between Acronis and third-party tools, and onboard new devices seamlessly into Acronis management.

Deploy software
Install third-party agents and applications on endpoints managed by Acronis RMM.

Custom actions
Start a remote access session directly from the Acronis device view using a third-party remote access tool.

Centralize monitoring
Monitor and manage third-party products and software on endpoints managed in Acronis.

Centralize alerting
Create alerts in Acronis based on events in third-party products.

Provide additional data for reports
Enrich Acronis reports with data collected from third-party products to give more comprehensive insights.

Provide usage and billing data for third-party products to Acronis PSA
Automatically send usage metrics and billing information from third-party products into the Acronis PSA for streamlined invoicing and accounting.

Custom scenarios
Integrations can create their own screens to cover scenarios that are not currently supported for integrations by Acronis products.

CyberApps let MSPs deliver third-party services with the same look, feel and efficiency as Acronis services.

* Using TicketBridge

Integration category	CyberApp (Third-party vendor)	How this integration expands Acronis	Alerts in Acronis*
Backup	Storage Guardian Veeam Microsoft 365 Migration Tool	Migrate Microsoft 365 backup from Veeam to Acronis.	
Cloud storage	Wasabi	Provide secure and affordable backup storage.	
	Impossible Cloud		
Compliance	Ascent	Monitor compliance posture.	
Dark web monitoring	CYVI Attack Surface Scanner (CASS)	Extend monitoring beyond known Acronis devices.	
	Edgewatch EASM		✅
	Cyfax External Attack Surface Management		
Email security	Plurilock AI	Secure domains that you manage.	✅
	Sendmarc		✅
	EasyDMARC		
Endpoint security	Canauri	Provide advanced protection.	✅
	Morphisec Adaptive Exposure Management and Anti-Ransomware Assurance		✅
	Cytellix Cyber Watch Platform		✅
	Exium		✅
Password management	LastPass	For secure password management.	
Remote desktop and assistance	RealVNC	Connect to any endpoints.	
	Supremo		
	Splashtop		
SASE and ZTNA	GoodAccess	Provide enhanced security monitoring and management.	✅
	NetBird		
	Timus		✅
Security awareness training	Infima	Provide security awareness training.	
	LYR8 Security Awareness Platform		
Threat intelligence and threat feeds	Genesis	Provide AI Driven penetration testing.	✅
Web and app security	Traitware	Extend phishing-resistant multifactor authentication (MFA) and single sign-on (SSO).	✅
MDR and SOC	Storage Guardian's Incident Response Planner	Provide managed EDR and XDR services without the up-front investment of setting up your own SOC.	
	Diamatix MDR		✅
SaaS application management	Auvik SaaS Management	Monitor and manage SaaS application usage by end users.	
Cyber insurance	DataStream	Provide cyber insurance.
