Acronis Cyber Foundation Program

The Acronis Cyber Foundation Program is a set of philanthropic initiatives carried out by a group of like-minded Acronis employees, partners and friends united to support multiple community development projects.

To enable a broader scope of action, we invite our Partners to join our projects.

Foundation Program areas

Education

- Schools Initiative — building schools in remote villages. **7000+ children impacted.** [Watch](#) the Foundation five-year anniversary video.
- IT Skills Program for ex-offenders, people with migration background, children and youth. **50,000+ people impacted** over 5 years.

Humanitarian aid

Disaster relief, support to people in areas affected by wars and conflicts. **10,000+ people** displaced from war zones, earthquakes victims impacted.

Environment and sustainability

Activities focused on environment implemented through local community projects with the help of local employees in regions where Acronis is present.

Launched in 2023.

300+ people involved

3,000+ kg of trash collected by employees

Partnerships

Engaging partners in our projects to increase the scope of action.

[CSR in a Box](#) – cybersecurity education initiative developed for children in our partners' communities.

Acronis Cyber Foundation #TeamUp Program

Imagine sharing the success of your growing business by helping others! Sound impossible? Not **with Acronis Cyber Foundation #TeamUp Program!** Turn your company into a beacon of change, **attract people who care, and make a difference in the global community.**

At Acronis, we believe in more than just protecting data; we are committed to securing the future. By joining forces with us, you significantly **impact the future generation**, positioning your brand as a **socially responsible business.**

Learn more how to start your first corporate social responsibility project with Acronis.

The importance of social responsibility

Be a responsible business

Social responsibility in the 21st century is a key component to being a successful business and an estimated 90% of all fortune 500 companies practice being socially responsible.

Give back to the community

Make a real difference in children's lives by providing education for boys and girls in remote communities. Education changes peoples lives and improves their standards of living.

Global impact

Partner with a global brand for global impact. Your employees, partners, and customers will love you for making a real difference in the world.

Our partners

We at BUSYMOUSE are proud to do something good far away from home with the help of the Acronis Cyber Foundation Program. As IT service providers, it's especially important to us to bring digital education opportunities to future generations.

Jan Schmidt

Marketing Director, BUSYMOUSE

The Acronis Cyber Foundation Program represents the same values that encouraged me to build the school in a village in the Dominican Republic. We are convinced that problems such as poverty and hunger can only be solved sustainably through education. That is why education must be available to everyone all over the world.

I'm glad that we have been able to partner with Acronis and are now working together towards this goal.

Sebastian Noelting

Managing Director, RNT Rausch

We were honored to work with the Acronis Cyber Foundation Program during CloudFest to raise funds to help support the initiative to bring free quality education to the needy community of San Antonio, Sololá. With this new school, we are giving the children of Guatemala an opportunity to learn about the world and improve their education.

Soeron von Varchmin

CEO, Cloudfest

We are proud to support the Acronis Cyber Foundation Program with a new classroom in Peru. Learning is at the center of our culture, and educational infrastructure helps communities thrive by improving the lives of individuals and families now and in the future. We're delighted to contribute our share to empowering youth in Peru with the knowledge and educational opportunities they deserve, as they will be the ones to one day make the changes this world needs.

How The Acronis Foundation Is Globally Impacting Education

Cheryl Robinson Contributor @ForbesWomen
1 focus on embracing the pivot during the coronavirus crisis

Education remains at the forefront of the Democratic presidential debates in the U.S., but it's also a global concern. The United Nations Educational, Scientific and Cultural Organization estimates that more than 617 million children and adolescents lack minimum proficiency levels in reading and math. In low-income countries, more than one-third are out of school and need a minimum in reading and math.

Arsenal support Acronis in Senegal school opening

1994-1995

We are proud to have been able to support the Acronis Foundation with their recent school opening event in Senegal.

Acronis, our official data backup partner, through the Acronis Foundation, helped to build a school in Soupa Serere for over 140 children, and we were delighted to be able to support the opening with a donation of Arsenal kit.

The school was built as part of a joint project between the Acronis Foundation and

Communication Technology in Education (ICT) education. Unfortunately, their goal has not been met. In many rural schools, only 2,000–3,000 feature

The Acronis Cyber Foundation first opened a new school in the village's previous educational buildings in this earthquake-prone region. The new classrooms and sanitary facilities, and school through fifth grade.

Communities around the world where children lack educational opportunities. Often partnering with other IT companies, the foundation focuses on the development of new schools that provide classrooms — which can help students gain digital skills as an integral part of this effort.

With the Internet — benefiting from its development. "It is important for our school to provide digital computer skills which provide children

the foundation and its project partners, build on the foundation of the development of the computer classroom.

Essential 21st-century technical skills," says the Acronis Cyber Foundation with a new

computer classroom in Nepal. This new educational infrastructure will help the community thrive by improving the lives of individuals and families — now and in the future."

With effective cybersecurity and data protection remaining a critical need, Acronis has provided the school with
