

Acronis

# The Miami Dolphins 'get up and running in minutes,' thanks to CSPi and **Acronis**

Florida-based MSP and the Miami Dolphins #TeamUp to safeguard business continuity and critical data.

The Miami Dolphins have partnered with CSPi Technology Solutions, a Florida-based MSP and Acronis #TeamUp partner, to protect the Dolphins' comprehensive IT environment spanning operations, broadcast and fan information.

The Dolphins required a robust backup solution to protect diverse data across multiple departments while ensuring immutable backups and malware-free data protection capabilities for their critical operations.

## THE SOLUTION

Acronis Cyber Protect Cloud with Advanced Backup and RMM.

## THE IMPACT

- Ensures data integrity, successful recovery and business resilience with reliable backups that enable operations to get up and running within minutes.
- Saves the Miami Dolphins' IT team significant time with expert support resolving issues swiftly.
- Increases CSPi's business opportunities and community presence through the high-profile sports partnership.

## KEY CHALLENGES:

- Diverse data across a network including critical operational, fan, video and broadcast information.
- Disparate data made it difficult to prevent corruption and maintain data integrity.

## KEY REQUIREMENTS:

- Scalable solution with single agent and console approach for simplified management.
- Reliable, immutable backup and fast data retrieval capabilities.
- Co-managed offering accessible to both organizations.
- A technology partner providing dedicated support and data protection expertise.

"CSPi has been fantastic to work with. Their engineers are super sharp and always available when we need them. They're an extension of our team because when we need them, they're there."

– Sameer Istafa, VP and CTO, Miami Dolphins
