Acronis Backup Advanced Universal License

Acronis

Acronis Backup Advanced comes in few flavors and Universal License allows using all available functionality**:**

- Data and System Protection of One physical server or One virtual host server with unlimited number of virtual machines on this host server.
- Centralized management, monitoring and reporting
- Advanced applications recovery functions
- Unlimited VM migrations to or from the licensed virtual host

Acronis Backup Advanced Universal License is:

- ✓ **Easy** – no need to check OS, hypervisors, applications, just number of physical machines
- ✓ **Complete** – Any system, Any application, Any data on Any device is protected with one license
- ✓ **Safe** – choose Universal License and get everything now and in future – no risk of extra costs

Even if there is new Hypervisor, new OS, new Application – it will be included in Universal License!

Here is detailed list of available functionality based on type of OS or Hypervisor installed on physical machine:

OS or Hypervisor	Available Data and System Protection Functionality
Windows	Physical Windows Operating System and all supported Applications*
Linux	Physical Linux Operating System
VMware vSphere ESXi	Unlimited number of Virtual Machines and supported Applications*
Microsoft Hyper-V	Physical Host OS, unlimited number of VMs and supported Applications*
Red Hat Enterprise Virtualization	Unlimited number of Virtual Machines and Applications*
Linux KVM	Physical Host OS, unlimited number of VMs and supported Applications*
XenServer	Physical Host OS, unlimited number of VMs and supported Applications*
Oracle VM Server	Physical Host OS, unlimited number of VMs and supported Applications*

For example, if Physical Machine (host) runs VMware ESXi, the Acronis Backup Advanced Universal License will allow backup of Unlimited VMs and protection of all Applications supported by Acronis Backup Advanced.

Full details of Acronis Universal License can be found in Acronis EULA, as well as on Acronis Website at www.acronis.com/legal/licensing.htm

(*) – Includes currently supported Microsoft Exchange, SQL, SharePoint and Active Directory
