Acronis

Acronis Business Solutions

Acronis is a global leader in new generation data protection providing cloud and on-premise backup, disaster recovery, and secure access solutions that improve data protection, recovery time, and employee productivity. Powered by the Acronis AnyData Engine and set apart by its image technology, Acronis delivers easy, complete and safe file access and sharing, disaster recovery, as well as backup of all files, applications and OS across any environment — virtual, physical, cloud and mobile.

Acronis Backup Service

Acronis Backup Service solves data protection challenges with a complete and easy-to-manage service that backs up data from any source and recovers it to any destination and system. Acronis Backup Service backs up physical and virtual servers and PCs to local storage or an Acronis secure data center and allows recovering individual files, hard disks, or your entire systems quickly and easily. Everything is managed through an easy-to-use web interface, reducing IT team's workload so it can focus on the core business of your company.

Acronis Disaster Recovery Service

Acronis Disaster Recovery Service is an all-in-one, comprehensive, hybrid cloud IT continuity solution that protects data and server environments in the event of a natural or man-made disaster. Acronis Disaster Recovery Service can reliably recover and run servers or entire data centers without the need for an organization to invest in duplicate systems or additional staff, until an original environment is restored. With cold, warm, or hot recovery options, Acronis Disaster Recovery Service combines the high performance and shortest recovery time of a local appliance with the low cost, predictability, and accessibility of a virtual, private, off-site cloud.

Acronis Backup

Acronis Backup simplifies backup and disaster recovery of your critical data; protecting your entire system – even if you are not an IT expert. Each product in the Acronis Backup family is an all-in-one complete solution tailored to manage your Windows® Server / Windows Server Essentials® / Linux® server , VMware®, and individual PCs - reducing downtime, data loss, and IT management. With key features including bare metal restore and Acronis Active Restore, our customers have reduced their recovery time by an average of 50 percent.

Acronis Backup Advanced

Acronis Backup Advanced delivers robust, easy- to-use unified data protection and disaster recovery for multi-system environments. Based on the business needs, customers can deploy individual solutions or seamlessly blend them together into one efficient backup solution and manage using a single unified console. The suite of products includes local and cloud backup and recovery for virtual and physical Windows / Linux environments; VMware®, Microsoft®, Citrix®, Red Hat®, Linux KVM, and Oracle® hypervisors; and Microsoft Exchange, SQL Server®, SharePoint® and Active Directory®. In minutes, it allows to recover individual files, application data, a complete system, and hypervisor environment to any location - reducing downtime and ensuring maximum data protection.

Acronis Backup to Cloud

Fully integrated with Acronis Backup and Acronis Backup Advanced, Acronis Backup to Cloud provides safe, secure, and scalable off-site backup of any data, anywhere, anytime. Customers simply buy a subscription, select the storage size needed, and go! Acronis Backup to Cloud lets you easily backup disks, partitions, and files to Acronis' secure Software Defined Storage at a remote datacenter and quickly recover entire files, folders, applications, or an entire system. Acronis Backup to Cloud is fully integrated into Acronis Backup and Acronis Backup Advanced providing easy hybrid backup of data and systems.

Acronis Snap Deploy

Ideal for rapid bare-metal initial deployments to a large number of workstations and servers, and on-going deployment to the same hardware in education, training, and lab environments, Acronis Snap Deploy lets you provision hundreds of workstations and servers as fast as you can provision one. Leveraging the Acronis AnyData Engine's disk- imaging technology, you can create an exact image of any standard configuration you choose- including the operating system, configuration, files, and all applications and simultaneously deploy the image to multiple machines in one easy step.

Acronis Disk Director

Acronis Disk Director is the most feature-rich disk management product available on the market today. Leveraging technical advances powered by the Acronis AnyData Engine, Acronis Disk Director lets you easily partition disks, clone disks, and repair a PC when the disk structure or file system is corrupted. Designed for IT professionals and power users, Acronis Disk Director lets you easily manage information, safely organize hard drives for superior performance, and protect and secure data.

Acronis Access Advanced

Acronis Access Advanced is an easy, complete, and safe access, sync, and share solution, providing IT with complete control over business content to ensure security, maintain compliance, and enable BYOD. Employees use any mobile device, PC, or Mac® computer to securely access and share corporate files with other employees, customers, partners, and vendors. Acronis Access Advanced enables BYOD and transforms mobile devices into a natural and secure extension of your business.

Acronis Access Connect

Acronis Access Connect (formerly Acronis ExtremeZ-IP) is the only solution that delivers the rich experience Mac users demand while maintaining the Windows compatibility that IT requires. An AFP file sharing service, Acronis Access Connect runs on your Windows server and enables Mac users to connect to file shares and NAS via AFP instead of the SMB protocol. The product is the best file and print sharing solution for integrating Macs into the Enterprise, including file access from mobile devices. Thousands of companies use Acronis Access Connect to overcome Mac to Windows infrastructure incompatibilities.

Acronis MassTransit

Whether your organization is in the advertising, publishing, printing, production, healthcare, education, or technology business, your employees, partners, and customers need to deliver all forms of digital content, creative layouts, movies, X-rays, engineering drawings, and other big files. With Acronis MassTransit, you can easily deliver and share files of all sizes at speeds you never thought possible – up to 20 times faster than traditional FTP tools. Acronis MassTransit improves productivity, minimizes risk of data loss and compromise, reduces shipping costs and email storage demands, and helps you maintain compliance with regulatory requirements such as HIPAA, SOX, GLBA, and PCI 3.0 in the U.S.
